

(a) Within-volume slice leakage

2D slices of one 3D scan fall on both sides of the split

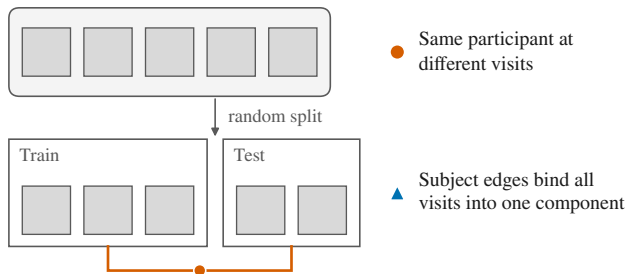

Subject A: one volume, 5 slices

(b) Longitudinal same-subject leakage

Visits of one participant fall on both sides of the split

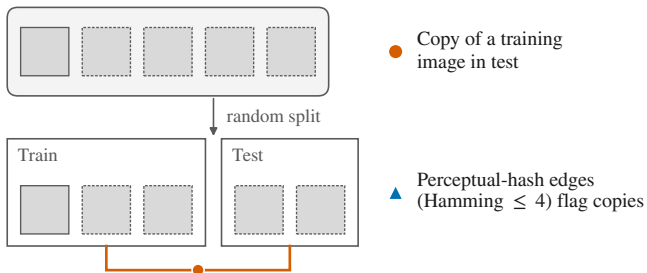

Subject B: 5 visits, m0 to m24

(c) Near-duplicate leakage

Augmented or rescaled copies of one slice cross the split

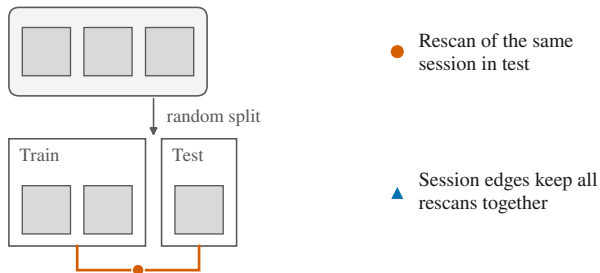

Subject C: 1 slice + 4 augmented copies

(d) Session re-acquisition leakage

Rescans from one imaging session cross the split

Subject D: session s1 scanned 3 times
